CLINIQUE LA PRAIRIE

WINS MAJOR PRIZE AT CONDE NAST TRAVELLER AWARD CEREMONY

Clinique La Prairie, the leading health Spa and Medical Centre based in Montreux, Switzerland, has won the 2nd top prize for world Medical and Thermal Spas at the recent Conde Nast Traveller award ceremony. This follows the clinic's award of third place at the same event last year.

The clinic, which was founded 75 years ago, has over the years acquired a world-wide reputation as a medical and beauty spa of the highest standards and achievements in the fields of preventative medicine, health, well-being and beauty treatments.

The philosophy of the clinic has always been based on dedicated research, combined with the continuous development of new and advanced techniques. Recent investment in an ultra modern Spa facility underlines Clinique La Prairie's determination to maintain its international leadership in the category of medical and beauty spas.

The clinic's traditional reputation can be attributed to its research into cell therapy and rejuvenation. Its exclusive treatment, CLP Extract, which has been painstakingly refined over the years, is a means of stimulating the immune system and slowing the aging process.

The Conde Nast Traveller Award is the fourth accolade presented to the clinic in the past year. The other three have been the Best Medical Spa (Sunday Times), the Best European Medical Spa (European Spa Exhibition, Monaco) and third place in last year's presentation by Conde Nast Traveller.
